

Nutshell Overview

No-code App Development Platform

Northumbria Police
Safer Transport Northumbria

Bespoke business apps, with no code

Empower your distributed workforce with sophisticated mobile apps, delivered in days rather than months, digitising your old business processes for a fraction of the cost of traditional mobile development.

Who are we?

We're Nutshell, we build business applications with our revolutionary no-code drag 'n' drop platform.

At Nutshell, we're on a mission to introduce no-code into as many industries as possible, to allow more businesses to digitise outdated processes.

Because our apps don't require any coding, they can be built and deployed incredibly quickly and at a fraction of the cost of traditional app development.

In summary, we're a fast-moving, agile developer, providing high-end solutions at low cost.

We're in good company

Nutshell is trusted by some of the biggest organisations in the UK to overcome enterprise mobility challenges across several industries including the rail, healthcare, facilities management, construction and education.

Balfour Beatty

Why choose Nutshell?

- ✓ Easy to customise
- ✓ Library of industry standard apps
- ✓ Fast, agile development
- ✓ Bypass App Store approval
- ✓ More affordable than native apps
- ✓ UK Based Build team & Support

Meet the Nutshell Container

The app where your apps live

Fuss-free publishing

With Nutshell's one click publishing, there are no tedious app store reviews to slow you down; just instant access to the mobile apps that drive your business, through the Nutshell Container.

Smartphone and Tablet

The Nutshell Container is able to host apps optimised for smartphone and tablet devices, in either landscape or portrait orientation, for absolute flexibility.

Instant Deployment

No more waiting weeks for app-store reviews. Nutshell lets you deploy business critical, customisable apps within seconds, at a fraction of the cost.

Deploy everywhere

Nutshell's container and one click publishing means business apps can be deployed simultaneously to iOS, Android and Windows devices.

Fancy yourself as an app builder?

Drag n' drop

Build slick user-interfaces and complex mobile workflows in minutes, using Nutshell's library of customisable drag n' drop components. Go beyond restrictive auto-generated templates- build it the way you want it.

Simple data-mapping

No need to learn complicated relational databases. If you can work with a spreadsheet, you'll be digitising your old-fashioned paper processes in no time with Nutshell's simple visual data-mapping.

Adaptable technology

Nutshell is designed to be the mobile front end to your existing digital ecosystem- the only risk-free environment in which to prototype, test and scale your mobile strategy without scaling your budget.

In the cloud or on premise

Build and run your apps in the cloud with Nutshell's out-of-the-box hosting packages, with data storage, SSL and enterprise-level security as standard.

Flexible deployment

Publish mobile apps across your organisation safely and discreetly, via public or private app stores or through your existing MIDM/EMM.

Enterprise-level Security

Trusted by some of the largest organisations in the UK, Nutshell handles mission-critical data at every possible level, which means security is of paramount importance.

Integrity as Standard

Nutshell comes pre-loaded with a host of enterprise-level security features, including SSL/TLS and anti-virus at server level, with database and app encryption at the device layer. Add authentication options, MDM compliance and instant remote user-removal, and you can rest assured your business data is in safe hands.

Scalable to suit your needs

Nutshell can be scaled to comply with any level of security requirement you might have, with a host of options from dedicated on-premise hosting and web application firewalls to military-grade DDoS mitigation and penetration testing. Contact our technical team for a comprehensive list of security options and pricing.
